

LegalEase – Phase 08: Project Demonstration

1. Demonstration Objective

Show the working LegalEase application from opening the project through user interaction and final output.

2. Demo Video Content

Include Project Name, Purpose, Uses/Benefits, Project Execution/Working Process and Final Output.

3. Suggested Voice-Over

Hello everyone. Our project is LegalEase – AI-Powered Legal Assistance. The purpose is to provide a simple interface for interacting with legal-related information using AI-assisted processing. The application accepts supported input, processes it through backend and AI components, and displays the resulting response.

4. Demonstration Steps

1. Start screen recording.
2. Introduce project name.
3. Explain purpose and benefits.
4. Open and run LegalEase.
5. Show the interface.
6. Enter a supported input/query.
7. Submit and briefly explain the working.
8. Show the final output.
9. Stop recording.

5. Google Drive Submission

Upload the completed demo video to Google Drive. Set General access to Anyone with the link and permission to Viewer. Copy the share link.

6. GitHub Entry

Add the final Google Drive demo link to the Phase 8 section or README according to the submission instructions.

7. Verification

Before submission, verify that the Drive link opens correctly for a viewer who does not own the file.
