

LegalEase – Phase 04: Project Planning

1. Planning Objective

The objective is to organize development activities, responsibilities, milestones and progress.

2. Planned Activities

Ideation, requirement analysis, design, planning, development, testing, documentation and demonstration.

3. Development Approach

Complete the project incrementally: understand the problem, define requirements, prepare design, develop, test, document and demonstrate.

4. Milestones

1. Idea and problem definition
2. Requirements finalized
3. Design prepared
4. Development completed
5. Testing completed
6. Documentation completed
7. Demonstration recorded

5. Risk Management

Possible risks include configuration problems, integration errors and incomplete documentation. Use incremental testing, backups and regular progress checks.

6. Conclusion

Phase-wise planning helps the team monitor progress and complete LegalEase in an organized manner.
